**ICT-enabled Distance Interpreting**

- **Direct view of participants**
  - Teleconference Interpreting (TCI)
  - Audioconference Interpreting (ACI)
  - Videoconference Interpreting (VCI)
- **No direct view of participants**
  - Remote Interpreting (RI)
  - Video Remote Interpreting (VRI)
  - Audio Remote Interpreting (ARI)

**Video-mediated view of participants**
- Multiscreen VRI

**No view of non-speaking participants**
- Single-screen VRI
**Distance Interpreting**
Information and communications technology (ICT)-enabled interpreting of a distant speaker at a given event.

**Teleconference Interpreting**
ICT-enabled interpreting of a distant speaker, where the interpreter has a direct view of some or all the other participants at a given event.

**Videoconference Interpreting**
ICT-enabled interpreting of a distant speaker, where the interpreter has a video-mediated view of that speaker and a direct view of some or all the other participants at a given event.

**Audioconference Interpreting**
ICT-enabled interpreting of a distant speaker, where the interpreter has no view of that speaker but a direct view of some or all the other participants at a given event.
Remote Interpreting
ICT-enabled interpreting of a distant speaker, where the interpreter has no direct view of the participants at a given event.

Video Remote Interpreting
ICT-enabled interpreting of a distant speaker, where the interpreter has a video-mediated view of that speaker but no direct view of the participants at a given event.

Single-Screen Video Remote Interpreting
ICT-enabled interpreting of a distant speaker, where the interpreter has a video-mediated view of that speaker but no view of the other participants at a given event.

Multiscreen Video Remote Interpreting
ICT-enabled interpreting of a distant speaker, where the interpreter has a video-mediated view both of that speaker and some or all of the other participants at a given event.

Audio Remote Interpreting
ICT-enabled interpreting of a distant speaker, where the interpreter has no view of that speaker nor of any other participants at a given event.
## Who is “remote”?

**Location of Interpreter or Interpreting Team**

- **Videoconference Interpreting**
  - **Two locations**
    - At primary location
    - At secondary location
    - At both locations (split team)
  - **Multiple locations**
    - At primary location
    - At a sub-location
    - At different locations (split team)
Location of Interpreter or Interpreting Team

Remote Interpreting

At single location
- Single interpreter
- Single booth
- All booths

At multiple locations (split team)
- Individual interpreters
- Individual booths
- Multiple booths
The duration of an interpreter’s turn in a video link will require attention. The conference interpreting profession has adopted 30-minute turns as the standard duration of a working turn for a conference interpreter. Our data and Moser-Mercer’s study show a decline in the interpreting quality (increase in the number of errors) after approximately 15 to 20 minutes, suggesting that interpreters may not be able to work for an extended period of time in a video link. What is noteworthy is that the guidelines for remote interpreting issued by the Wisconsin Circuit courts, which recommended 30 minute turns in 2006, were revised in 2010 and now recommend 15 minutes as the maximum length (Braun, 2011, p. 279).
